

ZRA ANNUAL CONFERENCE • LOS ANGELES, CALIFORNIA • OCTOBER 5-11

AnimalCare Software Workshop

Oct. 7, 2020

3:00pm- 5:00pm

AnimalCare Software would like to invite all current users, as well as those interested in learning more about our unique approach to customizable, cloud-based Record Keeping, Frontline Staff Communications, Welfare Management and more to our upcoming workshop.

AnimalCare Software, an electronic record system provider, teamed up with Dr. Isabella Clegg at Animal Welfare Expertise to develop the All-Animal Individual Welfare Template, a customizable tool that assists facilities in conducting simple and accurate welfare assessments.

Based on the Five Domains Model of Welfare, the template uses a set of welfare measures applicable to any species and instructs users how to use these measures and evaluate the results. The software also instantly allows users to compare multiple welfare measures over time and between individuals, groups and even between facilities.

At the workshop, we will demonstrate and train attendees on this new feature and discuss how to maximize the features of AnimalCare Software to fit each facility's needs. There will also be time available to answer participant's questions and hear suggestions for future development.

This is a great opportunity for ZRA members to learn more about what AnimalCare can do for your institution!
