

AnimalCare Software Workshop

Oct. 5, 2021

3:00pm- 5:00pm (ET)

The tool for meeting AZA 1.5.0. Welfare Standards now and into the future!

AnimalCare Software welcomes all conference attendees to participate in a hands-on workshop to learn more about our unique approach to customizable record keeping, frontline staff communication, welfare management, and more. We will demonstrate and provide training on the newest features of the system, as well as discuss how to maximize AnimalCare Software's capabilities to fit your institution's needs.

New Enhancements to the Welfare Management Module: Welfare monitoring has become integral to daily animal care. We provide a fast and intuitive solution for setting welfare goals and capturing quality of life metrics for all species to track against those goals. Powerful reporting tools allow users to generate graphs and reports over time.

New Module: Resource Typing for your own facility and emergency response.

New Feature: Welfare Template Marketplace: Find welfare templates created by experts in the field, or learn how to become a template author and share your expertise.
