

AnimalCare Software Workshop

Oct. 11, 2022

1:00pm- 4:00pm (CT)

AnimalCare Software Meeting Facility Needs Not Covered by Other Solutions.

AnimalCare Software welcomes all conference attendees to participate in a hands-on workshop to learn more about our unique approach to document storage, contingency planning for emergency responses, documentation of staff training, frontline staff communication, welfare management, and more. We will demonstrate examples of features of the system, as well as answer questions on how AnimalCare Software's capabilities can fill voids in your record keeping.

- New Module: Resource Management for coordinated emergency response. This was developed from a pair of ZAHP Grants.
- Welfare Management Module. Welfare monitoring has become integral to daily animal care. We provide a completely customizable tool that offers solutions to monitor welfare concerns of animals, facility, and procedures.
